

Ready Roast Nut Company PPO Pasteurization Services

Ready Roast Nut Company offers Propylene Oxide Pasteurization Treatment (PPO) for almonds, pistachios, other nuts and seeds.

Ready Roast offers the following PPO Services:

- 5-Log reduction as mandated by the almond industry
- Secure storage and load consolidation
- Post pasteurization microbiological testing
- Treatment for single pallet to multiple truckloads
- Online scheduling at www.ReadyRoast.com.

Get your 5-LOG KILL here!

Our facility is located in the center of California's San Joaquin Valley. Our close proximity to interstate highways, railroads and seaports enables us to accommodate efficient domestic and export shipments.

Our state-of-the-art facilities were designed with the Treatment Chamber in front and Post-Ventilation Room adjoined to prevent recontamination and provide for efficient product flow from start to finish.

**IF PPO IS PART OF YOUR PROCESSING PLAN,
BUT NOT A PART OF YOUR FACILITY,
CONSIDER US YOUR TRUSTED PARTNER.**

Our entire facility is operated and monitored by Hazard Analysis and Critical Control Point program (HACCP). Our treatment facility is validated to operate within the established SOP parameters established by the Almond Board of California.

We are committed to providing safe food products and exceptional service to our customers. Our staff is highly qualified and properly trained. Every aspect of our operation reflects our high quality standards.
